OBJECTIVES

The spirit of the congress is to foster an inter-disciplinary sensibility to the practice of architecture, and at the same time, to provoke thought about new design paradigms and approaches.

We also aim to think about important current issues within the profession such as: the digital revolution, ecological / climate-change awareness, multi-disciplinary demands from complex projects, the role of knowledge management, innovation and the impact of globalisation.

We aim to generate a relaxed working atmosphere, in which we can stimulate ideas, solutions, techniques and approaches aimed at improving design processes, attitudes and technologies which are going to be useful, as we move towards the immediate future.

FORMAT

Video-Exhibition

A video-based Exhibition of ACXT's work will be open throughout the congress.

Round Table Discussions

Round table discussions will be held in the auditorium, adjacent to the exhibition.

PROGRAMME
